Unified by design. Built for the AI era.

Iru AI is designed from the ground up to connect a grid of agents behind the scenes—across identity, endpoint, and compliance. Powered by the Iru Context Model, it understands your users, apps, and devices to act safely, intelligently, and in context across an organization.

Explore Iru AI

One integrated platform. Greater than the sum of its parts.

Iru gives you a single view of your users, apps, and devices. It's an integrated system to secure access, protect endpoints, and prove compliance while delivering a better employee experience.

Endpoint

Deploy endpoint management, detection & response, and vulnerability management in a single agent. Protect against threats and deliver great work experiences across Apple, Windows, and Android.

View Endpoint Overview

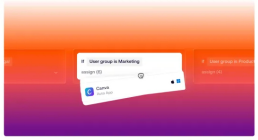
- Vulnerability Management +

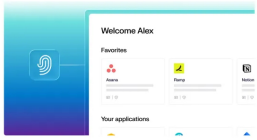


Identity

Passwordless workforce identity that grants secure access to every app. Wrap your apps and users in a trust fabric with device-bound authentication and robust security policies.

View Identity Overview

- Workforce Identity +



Compliance

Compliance automation that's fully powered by Iru AI tailors controls and builds an Adaptive Evidence Map. It keeps you audit-ready and unblocks deals with a public trust center.

Iru helps companies rewrite the way work is done

HUNTERS

"With Iru, we've significantly reduced IT workload, improved security posture, and enhanced the employee experience."

Erez Epstein
Senior Manager, IT & Operations at Hunters

Varo

"Iru is helping our endpoint security infrastructure to be the best it possibly can be."

Christian Corrales
Senior Security Engineer at Varo Bank

rackspace

"One of the biggest eye-catchers for me was how quickly we could get our security posture up to speed."

Dorian Cordero
Systems Engineer at Rackspace Technology

Let your team focus on what matters

Iru replaces fragmented tools with one AI-powered platform, so IT & security spend less time chasing tickets and more time improving the business.
